

4 MYTHS ABOUT POLYBUTYLENE PIPES

My Home Inspector Says They Look Fine

Many problems with polybutylene are not visible. Even if there are no leaks, the useful life of the pipes is most important to know (10-15 yrs).

It Will Destroy My Home

Choosing the wrong professional plumber could get messy. An expert carefully enters walls and ceilings to access pipes, making the job go quickly and with less mess.

I'm selling so I don't have to worry.

In our area it's widely known that polybutylene was used. Banks and buyers alike are aware, slowing the process for everyone involved.

Re-Pipes Cost a Fortune!

Not true! Like most home improvement projects, it's not cheap, but no more costly than re-shingling a roof, putting in new carpet or replacing your windows. Water damage from leaks can be far more costly.

You Can Count On Us!

Polybutylene piping is no joke! We have helped dozens of customers replace these dangerous pipes with safer, more reliable piping for years of damage-free service & peace of mind.

Call us today to find out if polybutylene is lurking in your home.
